LIGHTNING POLICY

If you see lightning or hear thunder, you are at risk and we advise you to take shelter. Verandah Club also has a lightning prediction system that will sound an alarm when unsafe conditions are present. A solid 15-second blast of the horns means the system is predicting lightning and you should seek shelter.

Once the system does not detect lightning in the surrounding area, a signal will be sent to the horns to activate. This signal is (3) five-second blasts. You can safely return to the golf course when you hear (3) five-second blasts.
